Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Drawings

1. Figures 1-3 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Objections

2. Claim 8 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. A multiplexer or Programmable Interconnect Matrix of claim 8 does not further define the apparatus of claim 1.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 7 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 7 recites the limitation "said first node" in the last line. There is insufficient antecedent basis for this limitation in the claim. Furthermore, the limitation "output signal

Art Unit: 2816

comprises a complement of said input signal when in said first node” is unclear because it cannot be determined what is being claimed here.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-6, 9-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Kaplinsky (US 5,920,210).

With regard to claim 1, Kaplinsky discloses in Fig.2 an apparatus comprising an input section configured to generate a first control signal (49) and a second control signal (50) in response to an input signal (40) and a select signal (OUT_EN, OUT_ENB); and an output section (51,52) configured to generate an output signal (53) in response to the first and second control signals, wherein the output signal is related to the input signal when in a first mode and disabled when in a second mode.

With regard to claims 2-6 and 9-14, Kaplinsky also meets all the claimed limitations in these claims.

Claim 15 is similarly rejected, note the above discussion with regard to claim 1.

With regard to claim 16, Kaplinsky discloses in Fig.2 a method for tri-stating an output of a bit, comprising the steps of generating a first state of the output by tracking an input (40) when in a first mode (when OUT_EN is high and OUT_ENB is low); generating a second state of the

Art Unit: 2816

output when in a second mode (when OUT_EN is low and OUT_ENB is high); and isolating the output from the input when in the second mode.

With regard to claims 17-20, Kaplinsky also meets all the claimed limitations in these claims.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. For example, Okitaka et al. (US 4,804,867) is cited as of interest because it discloses a three-state complementary MOS integrated circuit.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hai L. Nguyen whose telephone number is 703-306-9178. The examiner can normally be reached on Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Timothy Callahan can be reached on 703-308-4876. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9318 for regular communications and 703-872-9319 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0956.
